Beoordelingscommissie:	Prof. dr. D.E.H. de Boer Prof. dr. L.P. Louwe Kooijmans Prof. dr. D.C.M. Raemaekers

Preface

I would like to express my gratitude to my *Doktormutter* Wietske Prummel whose guidance and endless proofreading have greatly improved the current document. Prof. dr. Haio Zimmermann is warmly thanked for placing faith in and taking on board a young scholar. Prof. dr. Reinder Reinders, Prof. dr. Leendert Louwe-Kooijmans, Prof. dr. Daan Raemaakers and Prof. dr. Dick de Boer are thanked for their valued comments on an earlier draft of this thesis. Their suggestions have greatly improved readability.

Funding to cover the costs of the first three years of this study was obtained from the EWE-Stiftung, Oldenburg and the Helmut-und-Gertrud-Barthell Stiftung, Varel. The management at Wessex Archaeology is thanked for granting me unpaid leave and making it possible to change from full-time to part-time in order to finish my doctoral thesis.

My colleagues at the Niedersächsisches Institut für historische Küstenforschung are also warmly remembered. Especially Gregor Kulbach who put up with me in “jail”, Monika Sabrowsky who painstakingly sorted the soil sample residues and Wolfgang Reiners for building an excellent set of sieves. Thanks are also due to Dr. Rolf Bärenfänger and Gerd Kronsweide from the Ostfriesische Landschaft and Bernd Rasink, excavator of the Kirchstraße.

English readability was improved by Karen Walker and Dave Farwell. Their proofreading as non-zooarchaeologists was of great value.

Robert Kanters, Herman Kanters and Lisa Kanters of Ridderprint, Ridderkerk were very competent, helpful and friendly during the printing stage of this thesis.

My deepest gratitude is due to my parents who worked hard to pay for my education. Their enthusiasm for past cultures and archaeology has proven infectious. And last but not least; I would like to thank my husband for putting up with me in stressful times, for motivating me and for believing in me.

Animal keeping and the use of animal products in medieval Emden (Lower Saxony, Germany)

Contents

Preface

Chapter 1	Introduction	1
	1.1 Zooarchaeological methods	3
	1.2 An introduction to the Emden excavations	10
	1.3 Landscape and historical background of Emden	17
	1.4 Zooarchaeological research on medieval assemblages	20
	1.5 Research questions	22
Chapter 2	The animal bone analysis of the Rosenstraße excavation	24
	2.1 Relative frequencies of the species	24
	2.2 Body-part frequency	28
	2.3 Degree of fragmentation	30
	2.4 Age at death	30
	2.5 Sex	36
	2.6 Height at the withers	37
	2.7 Gnawing	38
	2.8 Butchery marks	39
	2.9 Bone density patterns	40
Chapter 3	The animal bone analysis of the Schulstraße excavation	43
	3.1 Relative frequencies of the species	43
	3.2 Body-part frequency	48
	3.3 Degree of fragmentation	48
	3.4 Age at death	49
	3.5 Sex	54
	3.6 Height at the withers	55
	3.7 Gnawing	56
	3.8 Butchery marks	57
	3.9 Bone density patterns	57
Chapter 4	The animal bone analysis of the Kirchstraße excavation	60
	4.1 Relative frequencies of the species	60
	4.2 Body-part frequency	63
	4.3 Degree of fragmentation	63
	4.4 Age at death	65
	4.5 Sex	70
	4.6 Height at the withers	71
	4.7 Gnawing	72
	4.8 Butchery marks	73
	4.9 Soil samples	73
Chapter 5	Animal keeping and the use of animal products in medieval Emden: a synthesis	79
	5.1 Zooarchaeological results	79
	5.1.1 Relative frequencies of the species	80
	5.1.2 Body-part frequency	90
	5.1.3 Herd structure and management	96
	5.1.4 Phenotype	105

	5.1.5 Animal health and welfare	112
	5.2 Synthesis	120
	5.2.1 Species richness and social stratigraphy	120
	5.2.2 Production of secondary products	122
	5.2.2.1 Milk	122
	5.2.2.2 Wool	123
	5.2.2.3 Traction	124
	5.2.3 Production of primary products	125
	5.2.3.1 Meat, marrow and fat	125
	5.2.3.2 Skin, fur and leather working	131
	5.2.3.3 Bone, horn and antler	134
	5.2.4 Waste management	141
Chapter 6	Medieval Emden in comparison with other coastal sites	146
	6.1 Species proportions	146
	6.2 Herd structure and management	154
	6.3 Phenotype	159
	6.4 Animal health and welfare	168
Chapter 7	Conclusions and summary	170
References		176
Appendices		193
	Catalogue of worked bone objects	193
	Plates	220
